I agree I am very tardy in getting back to you. My month of October was a mess due to my Dad's passing and I am only now recovering from the latent back log. I do not recall the circumstances of the referenced disconnect on the 911 circuit. Is this the situation where there was a question about the necessity of the T-1? I believe that the 911 circuit is up and running and no we will not disconnect a 911 circuit.

Karen can you please send me a spread sheet representing the charges to Bitwise for September, I believe that we implemented the new pricing effective with October, right? If not, then I will need the same data for October, so that I can 'extend' the prior spread sheet. Once I get the data, I will make the calculations and send it to you and Mike.

I have still not heard back from you on this account. It is scheduled for disconnect on Nov. 15th. I assume that since I am waiting on you that this will not happen. Please confirm.

Also it would seem that they have not applied the credit on the other account SB00002127824. I would also like to get this account accurate and paid. I paid \$8K per David Rudd's request last month but I have not yet paid anything this month since I do not know how much to pay. Please let me know when you have everything corrected on this account so that we know how much to pay.
